THRU : Ch/E
St/PR
Chief, D/I

Rescheduling of Project 32.222, "Current Trends in the Auto. Industry of the USSR".

1. Subject all source project was submitted on 3 June 1954, to St/PR. On 9 July St/PR forwarded it to St/PB. St/PB returned it to the responsible analyst on 16 July for an extensive re-organization and rewrite job. During the following period of time additional information was found which warranted incorporation into the report.

2. A review of the current status of the report shows that it will be complete and ready for submission to St/PR between 1 and 15 December 1954. I therefore recommend that it be renumbered and incorporated into the FY 55 program with a due date to St/PR of 15 December 1954. This date will allow some time for review by the Division Staff before submission.

3. The project was originally estimated at 700 man hours. As of 1 November, 844 hours have been expended. I recommend that this total be re-estimated as 950 hours in St/PR records.
